

Sustained Success Training

Martin Renton is available for consultancy, keynotes, demonstration lessons and interactive workshops. The topic areas he covers are suitable for all phases of 0 – 19 education, including Early Years, Primary, Secondary and Further Education.

From the Challenging Learning series:

- **FEEDBACK**

Identified as ‘the most powerful single modification that enhances achievement,’ feedback can include assessment for learning, praise, and marking.

- **APPLICATION**

Looking at what affects students’ motivation and application, and what we can do to improve this.

- **CHALLENGE**

How we can use the Teaching Target Model to ensure that challenge is a feature of every lesson, thus enhancing achievement and growth of learning.

- **THINKING**

‘The development of general ability for independent thinking and judgement should always be placed foremost, not the acquisition of special knowledge.’

- **SELF ESTEEM**

Developing emotional intelligence through the social and emotional aspects of children’s learning, boosting aspirations and motivation.

Also:

- **Assessment for Learning**

An assessment approach that builds on the data; target-setting with pupils, understanding goals, and strategies for talking about learning.

- **Creative Learning and Questioning**

Challenging students to be creative, original and inventive; and questioning techniques that aim to challenge, inspire and confuse!

- **The Creative Curriculum**

How to design and implement cross-curricular approaches; planning, teaching and leading purposeful school projects across subject areas.

- **Inquiry-Led Learning**

Improving engagement, and personalising learning by encouraging pupil dialogue, higher-order thinking and collaboration.
